

Friday 10th July 2020

Dear Parent/Carer,

As we approach the end of term, we have been reflecting on all of the wonderful things that have taken place this year. Various trips and visits have taken place, and we have been busy planning lots of engaging activities for the next academic year. We look forward to welcoming back many children next week to take part in a transition session. We are also very excited about organising a Zoom session where we will give all parents and children the chance to meet their new class teacher. Further details will follow next week.

Today, you should have received an email letting you know who your child's class teacher will be next year. If you have not received it by the end of the day, please contact office@groveacademy

I look forward to seeing many of you over the next few weeks (either at the school gate, or virtually).

Best wishes,

Beth Bullen

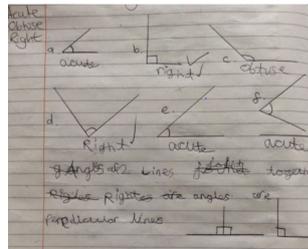

### Reception

It's been amazing to see so many of you back in school this week; and we, and your new teachers, are so looking forward to seeing you next week during the transition sessions. Whether you have been in school or at home, learning, you continue to amaze us with the quality of work you complete. Well done to both children and parents for continuing to make us a great team! Team Grove Reception!

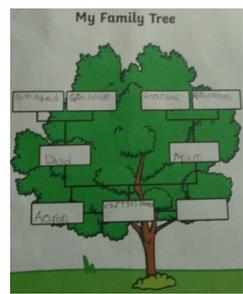

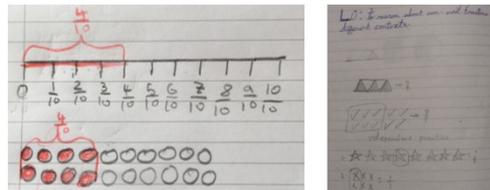

### Year 3

Year 3 have been working so hard. Some of the concepts, especially within mathematics, are new and challenging but you have persevered. This picture represents the different types of angles and their properties that the students have learnt about. Well done and have a lovely weekend!

### Year 4

This week, the children in Year 4 have started a new Talk for Writing unit based on Goblins. I have been impressed with

### Year 1

Wow! Another great week of hard work both in school and at home. This week's home learning focus was all about wonderful you. You have told us about your family heritage, interviewed family members and even completed family trees! Well done!

some innovated stories that have been emailed to me, or uploaded to individual portfolios. Year 4 are becoming confident in recognising and understanding fractions, and are able to represent fractions in different ways. In our project work, we have been finding out information about different mountain ranges in the United Kingdom.

### Year 2

In Year 2 the children continued learning about the importance of exercise, eating the right amounts of different types of food, and hygiene. They have also been learning about the Olympics, had a go at writing their own acrostic poems and fact files. Below you can see examples of our incredible work. Well done Year 2!

### Year 5

Year 5 continue to work hard both at school and at home. As well as the English and Maths work that they are doing every day, I have seen some wonderfully creative work. Some children are finishing making and decorating their drop rides and others have started investigating 'Properties and Changes of Materials.' Keep up the great work Year 5!
